**(54) Title:** IMPROVED COMPUTING SYSTEM AND COMPUTING DEVICE

**(57) Abstract**

The present invention relates to improvements in small computing devices, such as palm top type computers and mobile telephones. The small computing devices are adapted in accordance with the present invention to be able to access the large user interface, such as an interface associated with a desktop PC. The application running on the small computing device can control the display of the PC and receive commands from the QWERTY keyboard of the PC. The software application running on the computing device is adapted so that a different display is output depending upon whether the small user interface of the small computer is being accessed or the large user interface of the PC is being accessed.
